ATDDs

User focus: Software Requester		
User story theme: Sign up page		
As a government employee I want to be able to create a easy to use account where i can download software		
Acceptance test-driven development criteria (ATDD) (positive/negative)	**Failed**	**Passed**
[positive]Given the software Requester has a computer that works and internet access, when they sign up for the website, then they will be able to create and then view software requests	*	

User focus: Software Requester		
User story theme: View/Request software Page		
As a government employee I want to be able to view a variety of different software applications and then send a request so that I'm able to download the software I need and use it to aid me in doing my job		
Acceptance test-driven development criteria (ATDD) (positive/negative)	Failed	Passed
[positive] Given the Software requester is logged in to the system, when they fill out and then submit the software request form, then they will see a ticket has been created.	*	

User focus: Software Approver		
User story theme: Software Approver page		
As an Approver I want to be able to receive notifications that an employee is requesting access to a software that I am in charge of so that i'm able to either allow them to use it or not allow them to use it.		
Acceptance test-driven development criteria (ATDD) (positive/negative)	**Failed**	**Passed**
[positive] given the Software Approver is logged in to the system, when they review the page that displays all the tickets needing their approval, then they will be able to either approve or decline the request by pushing a button.	*	

User focus: Software Analyst		
User story theme: Software Analyst page		
As an analyst, I would like to be able to view the users information from their accounts to be able to determine if their request is valid		
Acceptance test-driven development criteria (ATDD) (positive/negative)	**Failed**	**Passed**
[positive] Given the software analyst is logged in to the system, when they review the current tickets in progress, then they will be able to select a ticket and make any changes on the ticket that are required	*	

User focus: Analyst		
User story theme: Analyst (ticket list page)		
As an analyst, I would like to keep track on the ticket list and alert the user if any attention is needed, so that I can improve my work efficiency		
Acceptance test-driven development criteria (ATDD) (positive/negative)	**Failed**	**Passed**
[positive] Given the software analyst is logged in the application, when s/he looking at the top right of the list, then s/he will see the number of pending requests.	*	
[negative] Given the software analyst is logged in the application, when s/he looking at the request list, s/he is not able to preview the request without click on it.	*	

User focus: Analyst		
User story theme: Analyst (view ticket page)		
As an analyst, I would like to have user notified with a key sent to them when so that I do not need to directly manage the key.		
Acceptance test-driven development criteria (ATDD) (positive/negative)	**Failed**	**Passed**
[positive] Given the software approver is processing the ticket, when s/he proceed the ticket and if the ticket was approved, then the system will notice user with a activated key.	*	

User focus: User

User story theme: User (view ticket page)

As an user, I would like to be notified of the completion of my ticket and be able to close it so that I can finish the request.

Acceptance test-driven development criteria (ATDD) (positive/negative)	Failed	Passed
[positive] Given the user receive a notice of the ticket is completed, when s/he finalize the ticket, then s/he can confirm the ticket is complete or s/he can take additional actions on the ticket.	*	

Acceptance Test-Driven Development

Did this activity change/add anything to your proposed design/plans

- That would be a negative.

Do you envision any possible gaps in testing

- Due to time constraints we believe that there will be gaps in our testing.

Would it have helped to do this activity pre-lo-prototyping?

- We think that it was fine to do it now

Create Express serv host on Heroku

"Daily" Scrum

Progress
- Our app is live
- Skeleton of the site has been created, working on adding functionality and creating consistent CSS across the site

Any barriers to your group's success?
- No outstanding barriers to success

Do you envision being able to achieve more (or less) for your release 1/MVP?
- We feel we are making quick progress so far but anticipate a slow down once we dig into more functionality

Changes & Misc.

Have your plans changed since your group's initial conception and project evolution?
- The plans haven't changed overall, but simply gotten clearer as we start implementing

Other insights:
- "The average car in space is nicer than the average car on earth" - Reddit

Group reflection

How did we feel about this milestone? What did we like? What did we dislike?
- We have enjoyed working on a concrete implementation as a group, and having a live app was a great milestone for us as a group

What did you learn about yourself as you collaborated and worked through this milestone?
- Working on an app as a group has been far more fulfilling than working solo

How will you use what you have learned going forward?
- The sky's the limit

What "stuff & things" related to this milestone would you want help with?
- Not really
